

Replace M.2 Drive in CatalystII

Replace M.2 Drive in CatalystII

This document will go through the steps to help you replace the M.2 drive on CatalystII machines with the Q470 motherboards.

Required Tools

- Torx 10 screwdriver
- 00 Philips screwdriver
- Rimage replacement M.2 drive

Before You Begin

- Power off the Rimage system

Removing the M.2 Drive

1. Remove the 8 Torx 10 screws from the back panel of the Catalyst II machine.

R I M A G E[®]

2. Locate the M.2 Drive

3. Remove the philip screw that holds the drive down.

Notes:

- Once the screw is removed the drive will spring up a little bit
