Installing or Upgrading Your Software

To install your new software, refer to the Setup and Installation instructions included with your Rimage Autoloader or Printer. The Setup and Installation instructions for your product are also available at www.rimage.com/support. From the Support page, browse to *Your Product Series*, then select *Your Product > Documentation*.

Printer and autoloader firmware is not automatically updated when you update your software. After you install your new software, visit www.rimage.com/support to check for firmware updates and service packs. From the Support page, browse to *Your Product Series*, then select *Your Product > Downloads*.

Changes to Version 8.7
