

Rimage Copy Station Software

Version 2.5 Release Notes

Introduction

This document describes the changes to Rimage Copy Station software for version 2.5.

Prerequisites

- Rimage Software Suite version 8.5 with Service Pack 2 for Rimage Software Suite 8.2-8.5.
- Rimage Software Suite – Network version 8.6.
- Rimage Software Suite – Network version 8.7.

Installation

Install the **Rimage Copy Station 2.5** software.

Note: You must have administrator rights to install this software on the Rimage control center.

1. Close the **Copy Station application**.
2. Pause **Production Server**.
3. Insert the **Rimage Copy Station 2.5 disc** into the Rimage Producer or Professional autoloader.
4. Browse and select **Setup.exe**. The installation wizard starts.
5. Follow the **wizard prompts**.

The Rimage Copy Station is ready for use.

Support and Functionality Provided

Changes to Rimage Copy Station software since version 2.4.

Support and Functionality Changes

- Added ability to copy masters to a different media type. (Only available with version 8.7 Rimage Software Suite.)
- Added the ability to select a label to be printed on a copy.
- Added support for BD-R Triple Layer (BDTL) media. (Only available with version 8.7 Rimage Software Suite.)
