An End-to-end Professional Solution

Rimage Disc Authoring is a powerful end-to-end solution that brings your disc production in-house. You can author high-quality DVDs using photo, video and audio with zero dependency on third-party vendors.

Using one integrated system, you can author discs, record content, create case wraps and print photo-realistic images directly to disc. Rimage's print technology gives you a professional looking deliverable, while improving your productivity and the bottom line.

Benefits

Workflow Automation
Integrates seamlessly with Rimage disc publishing platforms. Automate disc production and improve workflow without sacrificing quality.

Easy to Use
With the wizard-based interface, create professional DVDs in three simple steps: load, design and produce. Manage in-house production without overcoming a steep learning curve or outsourcing to a third-party.
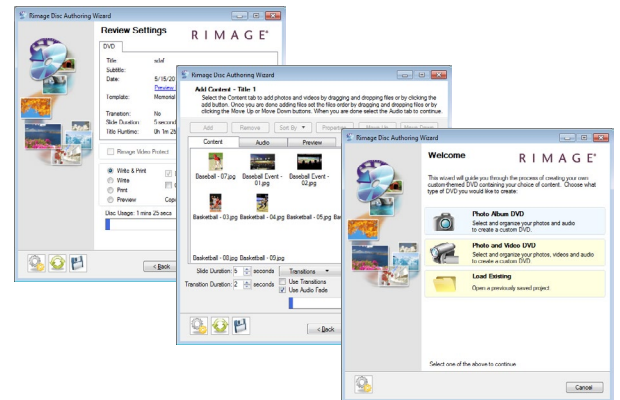

Powerful Customization
The software includes a wide selection of customizable templates for a variety of different uses and markets. Offer a variety of eye-catching products, tailored to specific customer requirements.

Features

- Wizard-based disc authoring software
