

Manually Remove the RT sheet from an Everest 400.

1. Power off the unit and disconnect the power cable.
2. Remove the right side cover of the unit.
 - Four (4) screws on the top
 - Five (5) screws on the side
3. Locate the black half circle gear behind the long wide flex cable.

4. Push the black gear clockwise all the way down, about a half turn.
 - Note: There will be significant resistance, so use some force.

5. Remove the Retransfer Sheet.
