

Rimage® SDK

Version 9.2 Release Notes

Introduction

This document describes the changes to Rimage SDK for version 9.2.

Compatibility Notes

The Rimage SDK is compatible with Win 32, Win 64, Mac OSX (Java SDK) and Linux (Java SDK). SDK can be installed on the following Windows platforms:

- Windows 7 (32 and 64 bit) (excluding Windows 7 Starter and Windows 7 Home Premium)
- Windows 8 and 8.1
- Windows Server 2008 R2
- Windows Server 2012 R2
- Windows 10 Professional and Enterprise

The Rimage SDK is intended for use with Rimage Software Suite 8.4 or higher.

Changes to Rimage Rapid API since version 9.1

Added new features and fixed outstanding bugs.

New Features

Rapid API:

- Jira RAPID-46: added capability to do hash verification.
- Added RefreshParameters to the ServerInfoRefreshType.
- Added the Pay-per-click Alert Level parameter.
- Added the Update Order Archive Table parameter.

Samples:

- Fixed problem with image generation of more than can fit on a CDR in the RapidApi/C++/Rapid Comprehensive C++ sample.
- Changed OnPrinterInfo to display either ribbon or ink info depending on the printer type in the RapidApi/C++/RapidMFC sample.
- Changed the parent folder and the media type in the ClientApi/C++/CPlusSample.
- Removed the ClientApi/C++/Client Hello World sample. It did not function properly.
- Added the RapidApi/NET/HashVerifySample.
- Added the ClientApi/C#/MultiConnectionSample.
