3. From the software deployment site

(<u>http://swdeploy.rimage.com/DistSetup/v9.4.1/feed/atom.xml</u>), select Rimage Bridge Server under the Related Setups to download the installer.

	Rimage Software Suite v9.4.1.50
	Rimage Software Suite v9.4.1.50
Rima	age Software Suite installs Rimage Servers, and includes related clients and management tools.
Related Setu	<u>ups</u>
• <u>R</u>	image QuickDisc Client (QDsetup.exe) installs the Rimage QuickDisc client application and related tools.
• R in R	<u>image System Manager (SMsetup.exe)</u> installs the Rimage System Manager application. Rimage System Manager is itended to replace the functionality that was in the Rimage System Manager (java) application and is used to manage image Servers.
• <u>R</u> a	<u>image web-System Manager (WRSMsetup, exe)</u> installs the Rimage web-System Manager as a IIS hosted browser pplication to manage Rimage Servers.
• B	mage NetPubW Editor (NpwEditorSetup.exe) installs tools to manage NetPubW jobs.
• R	image Order Archive Manager (OAMsetup.exe) installs tools to manage the Rimage database related to tracking rders.
• R re th	<u>image QuickDisc Templates Addon (DistSetupQuickDiscTemplatesAddon.exe)</u> is an Addon setup, which does not equire DistSetup.exe. This setup installs QuickDisc Label Templates, either locally or on a remote server, for use by he Rimage QuickDisc client. If the setup is installed with DistSetup.exe then uninstalling (or repairing) DistSeetup.exe esults in the same actions applied to this Addon
R	image Bridge Server (DistSetupBridgeSrvAddon.exe) is an Addon setup, which requires DistSetup.exe, and provides upport for legacy Production Protocol and Imaging Protocol jobs.

4. Run the installer from the Rimage Control Center to install the Bridge Server (requires internet connection).

If the control center does not have internet connection, you can do a full download of the files for a local install.

Create a local install package for Bridge Server (the previous download is just an executable and requires internet access to pull the actual files down for the application).

- 1. After downloading the Bridge Server installer executable, create a shortcut for it.
- 2. Right-click the short cut and select Properties.
- 3. On the Target line, add -LAYOUT and press OK.
